WELCOME

However you found your way here, welcome! This guide is yours to write in, dog-ear, and come back to. There are no grades, no streaks to keep perfect, and no level you have to reach first. Just eight steady chapters, one honest rep at a time.

— *with you in it, Alaias*

CHAPTER ONE

YOUR WHY &
YOUR STARTING LINE

READ · REFLECT · PLAN · JOURNAL

i READ

Before we touch a single workout, we get clear on why. The people who actually build a lasting relationship with movement aren't the ones with the most discipline, they're just the ones with the clearest reason. Your habits around exercise were built over years by gym-class memories, before-and-after culture, and an industry telling you your body is a problem to fix. Is that resonating?

This chapter isn't about which workout to do. It's about remembering who you're doing this for, and deciding that person deserves care, not punishment. You don't have to earn the right to move, and you don't have to hate your body to change it. Movement is an act of self-respect and it begins long before you ever lace up.

CHAPTER ONE

YOUR WHY &
YOUR STARTING LINE

READ · REFLECT · PLAN · JOURNAL

i READ

Here's something worth saying out loud: your relationship with exercise probably wasn't built in a gym. It was built in moments. Being picked last. A comment in a changing room. A fitness plan you "failed," that quietly taught you that your body and willpower couldn't be trusted.

Here's what's useful to understand: when an experience lands hard, your brain doesn't just file it away — it keeps it. It takes a snapshot and replays it, sometimes for years, so that an old story ends up running today's decisions. That's why "I'm just not a fitness person" can feel like a fact when it's really just a well-worn loop.

But that's also where the way out lives. Change doesn't begin when you finally find enough discipline. It begins the second you become aware of the loop and when you stop being a passive witness to your own story and start watching it with clarity. Movement isn't a punishment for the body you have. It's a way of caring for the body you live in.

So before we build a single routine, this is the work: noticing the story you've been carrying about exercise and your body, and getting honest about where it came from.

CHAPTER ONE

YOUR WHY & YOUR STARTING LINE

READ · **REFLECT** · PLAN · JOURNAL

BESTIE TIP

Your "why" can't be a number on a scale or a deadline. Those run out. Anchor it to a feeling: energy, strength, ease on the stairs, showing up for the people you love.

ii REFLECT

No wrong answers here. Just be honest with yourself.

When I think about exercise and my body, the first feeling that comes up is...

The person I most want to feel strong and capable for is...

CHAPTER ONE

YOUR WHY &
YOUR STARTING LINE

READ · REFLECT · **PLAN** · JOURNAL

iii PLAN

An honest starting line, no judgment. This is just a snapshot of today, not a verdict.

MY ONE KIND MOVE

WHEN I'LL DO IT

HOW I'LL KNOW IT WENT WELL (A FEELING NOT A NUMBER)

YOUR WHY & YOUR STARTING LINE

READ · REFLECT · PLAN · JOURNAL

iv JOURNAL

Write a letter to the version of you who first decided your body was a problem to fix. What would you tell her now?

This guide is here to support a stronger, kinder relationship with your body, not to diagnose, treat, or prescribe. If movement ever starts to feel like a source of compulsion or anxiety rather than care, please reach out to a qualified professional. You deserve real support 💕.

CHAPTER TWO

FITNESS FOUNDATIONS

READ · REFLECT · PLAN · JOURNAL

i READ

Forget complicated programs and gym jargon. Real fitness rests on three pillars working together: strength, cardio, and mobility & recovery. None of them is the "right" one. They each do a job, and they do it best as a team.

Strength builds and shapes you, and protects your joints for life. Cardio looks after your heart, your stamina, and your mood. Mobility and recovery are where the results actually lock in. When you stop chasing one and start treating all three as teammates, movement gets a lot quieter and a lot kinder.

CHAPTER TWO

FITNESS FOUNDATIONS

READ · REFLECT · PLAN · JOURNAL

i READ

Before we build a routine, we have to understand movement.

Because here's the thing, most of us were never actually taught how to train. We were handed a one-size punishment of a P.E. class, then graduated to tabloids and "transformation" culture that told us the goal was to shrink, to suffer, and to feel guilty when we rested. That's not fitness. That's the diet industry in workout clothes, and it's been talking over you your whole life.

So let's turn the volume down on that voice and look at what's true. Your body is a living, working system, and movement is how you keep it capable. That capability comes from three main places, we call them the pillars.

Strength · Cardio · Mobility & Recovery

Not good ones and bad ones. Three teammates, each with a job only it can do.

CHAPTER TWO

FITNESS FOUNDATIONS

READ · REFLECT · PLAN · JOURNAL

i READ

STRENGTH

Strength is your foundation. It builds and maintains muscle, protects your joints and bones, and keeps you capable: lifting, carrying, getting up off the floor with ease for decades. You don't need heavy weights to start; bodyweight, a band, or a pair of dumbbells is plenty.

CARDIO

Cardio is for your heart, your lungs, and your mood. It's the energy system behind walking further, climbing stairs without thinking, and feeling clearer afterward. The best cardio isn't the hardest, it's the kind you'll actually repeat.

MOBILITY & RECOVERY

This is where everything locks in. Mobility keeps you moving freely; recovery, sleep, and rest days are when your body adapts and gets stronger. Rest isn't the opposite of training, it's part of it.

CHAPTER TWO

FITNESS FOUNDATIONS

READ · REFLECT · PLAN · JOURNAL

ii REFLECT

No wrong answers here. Just be honest with yourself.

The pillar I tend to neglect most is... (and a kind guess at why)

A way I already move that I genuinely enjoy is...

KEY TERMS PLAINLY

Reps & Sets - how many times, and how many rounds

Progressive overload — gradually doing a little more over time

Form over ego — quality reps always beat heavy, sloppy ones

CHAPTER TWO

FITNESS FOUNDATIONS

READ · REFLECT · **PLAN** · JOURNAL

iii PLAN

Pick one week and gently invite all three teammates in — even briefly.

ONE STRENGTH MOVEMENT I’LL ADD

ONE BIT OF CARDIO I’D ACTUALLY REPEAT

ONE WAY I’LL RECOVER OR REST ON PURPOSE

CHAPTER TWO

FITNESS FOUNDATIONS

READ · REFLECT · PLAN · JOURNAL

iv JOURNAL

Which of the three pillars feels most like "you," and which one have you been quietly avoiding? Be honest about why.

A NOTE OF CARE

This guide is here to support a stronger, kinder relationship with your body, not to diagnose, treat, or prescribe. If movement ever starts to feel like a source of compulsion or anxiety rather than care, please reach out to a qualified professional. You deserve real support 💕.

CHAPTER THREE

BUILDING YOUR WEEKLY SPLIT

READ · REFLECT · PLAN · JOURNAL

i READ

Here's the whole system: a "split" is just how you spread movement across your week. Three to four focused days beat seven half-hearted ones, every time. No perfect schedule, no all-or-nothing. It works around any life, any week, because it's a rhythm, not a rulebook.

The beauty of a split is that it bends around your life instead of asking your life to bend around it. A busy week, a quiet week, a week that falls apart, the same simple shape carries you through all of it. You're not aiming for a flawless week. You're aiming for a week you can actually repeat.

CHAPTER THREE

BUILDING YOUR WEEKLY SPLIT

READ · REFLECT · PLAN · JOURNAL

i READ — SIMPLE STARTING SPLIT

So why a split? It isn't a trend, and it isn't random. Each day has a quiet job, and once you see the job, the split stops being a rule you follow and starts being a tool you reach for.

3-4 STRENGTH DAYS

The backbone of the week. Full-body sessions that hit the major movement patterns leave you capable and steady, and don't demand you live in the gym.

1-2 CARDIO/HIT

Full body movement that train endurance and support your cardiovascular system.

1-2 RECOVERY DAYS

Gentle movements: stretching, walks, cycling, a kitchen dance gentle daily movement adds up far more than the occasional brutal session. This is the part that quietly changes everything.

CHAPTER THREE

BUILDING YOUR WEEKLY SPLIT

READ · **REFLECT** · PLAN · JOURNAL

BESTIE TIP

The split is a guide, not a cage. Some weeks will look exactly like it and some won't, and both are completely fine. Three protected days beat a perfect plan you abandon by Wednesday.

ii REFLECT

No wrong answers here. Just be honest with yourself.

The days of the week that realistically work best for me are...

The part of planning a week I find hardest to protect is...

CHAPTER THREE

BUILDING YOUR WEEKLY SPLIT

READ · REFLECT · **PLAN** · JOURNAL

iii PLAN

Map a loose week, not a rigid menu. Just enough to remove the hardest decisions.

DAY	FOCUS (STRENGTH / CARDIO / RECOVERY)	HOW LONG

TUESDAY		
WEDNESDAY		
THURSDAY		
FRIDAY		
SATURDAY		
SUNDAY		

BUILDING YOUR WEEKLY SPLIT

READ · REFLECT · **PLAN** · JOURNAL

Describe your ideal realistic week, not the perfect one, the one you'd actually repeat.

This guide is here to support a stronger, kinder relationship with your body, not to diagnose, treat, or prescribe. If movement ever starts to feel like a source of compulsion or anxiety rather than care, please reach out to a qualified professional. You deserve real support 💕.

CHAPTER FOUR

STRENGTH TRAINING AT HOME

READ · REFLECT · PLAN · JOURNAL

/ READ

You don't need a gym to get strong. You need a handful of foundational patterns and a little consistency. Master six movements, squat, hinge, push, pull, lunge, and core/carry, and you can build real strength with bodyweight, a band, or a pair of dumbbells, anywhere you have a bit of floor.

This isn't about punishing workouts or chasing soreness. It's about repeatable movements you can do well, slowly add to over time, and actually look forward to. Strength is a skill you practice, not a test you pass or fail.

CHAPTER FOUR

STRENGTH TRAINING AT HOME

READ · REFLECT · PLAN · JOURNAL

i READ

BESTIE

Start lighter than you think and earn the heavier weight. Form first, always. A clean rep you can feel beats a heavy one you can't control. Strength is patient.

Progressive overload. Muscle grows when you ask a little more of it over time. When a weight starts to feel easy when you could do more than 12 clean reps, that's your signal to make it harder. You don't need a rack of weights to do this; you have options (see the next page).

WHAT YOU'LL NEED

- One or two pairs of dumbbells (a lighter pair for upper body, a heavier pair for legs is ideal)
- Workout Mat
- Some free open space

That's it!

CHAPTER FOUR

STRENGTH TRAINING
AT HOME

READ · REFLECT · PLAN · JOURNAL

i READ

BESTIE

You won't progress every single lift every single week and that's normal. Strength isn't linear. Showing up consistently is what compounds.

THE ENGINE

HOW TO KEEP GETTING STRONGER.

THE LEVER	WHAT TO DO
ADD WEIGHT	Move up to a heavier pair of dumbbells once 12 reps feels controlled and doable.
ADD REPS	Work toward the top of the rep range, then beyond it, before adding a set.
ADD A SET	Go from 3 sets to 4 on your strongest lifts. More quality volume drives growth.
SLOW IT DOWN	Take 3–4 seconds to lower the weight. Tempo makes a light dumbbell feel much heavier.
REST LESS	Trim rest toward one minute to raise the overall challenge once you're moving well.

THE PLAN

A SIMPLE 4 WEEK RHYTHM

WEEK	FOCUS
WEEK 1	Learn the moves. Go light, nail your form, finish each set with a couple reps left in the tank.
WEEK 2	Add reps. Push toward the top of each rep range with the same weights.
WEEK 3	Add weight or a set on the lifts that feel strong: squats, rows, presses, deadlifts.
WEEK 4	Heavier or slower than week 1, moving with confidence. Then repeat, a notch up.

CHAPTER FOUR

STRENGTH TRAINING AT HOME

READ · REFLECT · PLAN · JOURNAL

i READ

Six patterns cover almost everything your body does in a day: sitting, lifting, reaching, carrying. Learn these and you can build a whole practice anywhere. Here's what good looks like, and the slip to gently watch for.

SQUAT *sit down & stand up*

WHAT GOOD LOOKS LIKE

Chest tall, weight in your heels, knees tracking over your toes as you sit back and down.

COMMON SLIP

Knees caving inward or heels lifting. Widen your stance and push the floor away.

HINGE *bend from the hips*

WHAT GOOD LOOKS LIKE

Soft knees, hips travel back, along flat back as the weight slides down your legs.

COMMON SLIP

Rounding the lower back or squatting. Instead with the hips going backward, not the knees bending.

PUSH *press away from you*

WHAT GOOD LOOKS LIKE

Steady core, shoulders down away from your ears, pressing in a smooth controlled line.

COMMON SLIP

Shrugging the shoulders up or flaring the ribs. Brace your middle and keep the neck long.

PULL *draw toward you*

WHAT GOOD LOOKS LIKE

Lead with the elbow, draw your shoulder blade back, squeeze gently at the top.

COMMON SLIP

Yanking with the arms only. Think of starting the pull from your back, not your hands.

LUNGE *split your stance*

WHAT GOOD LOOKS LIKE

Tall torso, front knee over the ankle, back knee lowering toward the floor with control.

COMMON SLIP

Front knee drifting past the toes or wobbling. Instead shorten the step and drive through the front heel.

CORE / CARRY *brace & stay steady*

WHAT GOOD LOOKS LIKE

Ribs stacked over hips, a gentle all-around brace, breathing steadily as you hold or walk.

COMMON SLIP

Holding your breath or letting the hips sag. Keep breathing and think "long and tall."

CHAPTER FOUR

STRENGTH TRAINING

AT HOME

READ · REFLECT · PLAN · JOURNAL

i

READ

No gatekeeping, no jargon. Here’s a plain-language shelf you can flip back to any time a word stops you in your tracks. They’re tools to help you move with a little more confidence.

TERM	SESSION
REP	Short for repetition — one full movement, start to finish. One squat is one rep.
SET	A group of reps done back to back, then a short rest. “3 sets of 10” means ten reps, rest, repeat twice more.
REP RANGE	A flexible window, like 8–12, rather than one fixed number. Stay in the range and let your body pick the day’s figure.
PROGRESSIVE OVERLOAD	Gradually asking a little more of your body over time — a touch more weight, a rep or two more, a slower tempo. This is what drives change.
FORM OVER EGO	The shape and control of a movement. A clean rep you control always beats a heavy, sloppy one — lighter and steadier wins.
TEMPO	How fast or slow you move through a rep. Slowing the lowering phase makes a light weight feel much harder.
MOBILITY	How freely and comfortably a joint moves. A little maintenance keeps everything else feeling good.
RECOVERY	Everything that helps your body adapt between sessions — sleep, rest days, gentle movement. Where the results actually lock in.
BRACE	Gently tightening the muscles around your middle to protect your spine, as if bracing for a light poke.
RIR (reps in reserve)	How many reps you could still do at the end of a set. Finishing with “a couple left in the tank” is a kind, sustainable place to be.

CHAPTER FOUR

STRENGTH TRAINING AT HOME

READ · REFLECT · **PLAN** · JOURNAL

iii PLAN

ROUTINE ONE

FULL BODY

(about 35–40 minutes)

SQUAT · PUSH · PULL · LUNGE · CORE

**GOBLET SQUAT***Hold one dumbbell at your chest, sit back and down.***3 SETS**
8-12 REPS**FLOOR CHEST PRESS***Lie back, press both dumbbells up over your chest.***3 SETS**
8-12 REPS**BENT-OVER ROW***Hinge forward, pull both dumbbells to your ribs.***3 SETS**
8-12 / SIDE**REVERSE LUNGE***Step back into a lunge, dumbbells at your sides.***3 SETS**
8-12 / SIDE**OVERHEAD PRESS***Press both dumbbells from shoulders to overhead.***3 SETS**
8-12 REPS**PLANK & ROW***From a plank, row one dumbbell at a time.***3 SETS**
6-10 / SIDE

WARM UP FIRST | 5 MIN

March in place, roll your shoulders, do 10 bodyweight squats and a few arm circles. Warm muscles work better and stay safer.

CHAPTER FOUR

STRENGTH TRAINING AT HOME

READ · REFLECT · **PLAN** · JOURNAL

iii PLAN

ROUTINE TWO

FULL BODY

(about 35–40 minutes)

HINGE · PULL · PUSH · CORE

**ROMANIAN DEADLIFT***Soft knees, hinge at hips, slide dumbbells down.***3 SETS**
8-12 REPS**DUMBBELL SHRUG***Stand tall, lift shoulders toward your ears.***3 SETS**
10-12 REPS**FRONT RAISE***Raise dumbbells in front to shoulder height.***3 SETS**
10-12 REPS**BICEP CURL***Curl both dumbbells up, control on the way down.***3 SETS**
10-12 REPS**TRICEPS KICKBACK***Hinge forward, extend dumbbells straight back.***3 SETS**
10-12 REPS**RUSSIAN TWIST***Lean back, rotate one dumbbell side to side.***3 SETS**
12-16 REPS**COOL DOWN | 5 MIN**

Finish with gentle stretches for legs, back, and shoulders, and a few slow breaths. This is where recovery begins.

CHAPTER FOUR

STRENGTH TRAINING AT HOME

READ · REFLECT · **PLAN** · JOURNAL

iii PLAN

BESTIE TIP

Here's one simple way to lay out the week. Move the days around to fit your real life. Consistency matters more than the calendar.

DAY	SESSION	NOTES
MONDAY		
TUESDAY		
WEDNESDAY		
THURSDAY		
FRIDAY		
SATURDAY		
SUNDAY		

READ · REFLECT · PLAN · JOURNAL

Where do you tend to rush, push, or punish, and what would "patient" look like instead?

A care note: This program is general guidance, not medical advice. Move in a way that respects your body, not one that punishes it. Stop if you feel sharp pain or dizziness, and check with a doctor or physical therapist before starting if you're pregnant, postpartum, injured, or managing a health condition. If movement ever starts to feel like a source of compulsion or anxiety rather than care, please reach out to a qualified professional, because you deserve support.

CHAPTER FIVE

CARDIO & MOVEMENT YOU'LL ACTUALLY DO

READ · REFLECT · PLAN · JOURNAL

i READ

The best cardio is the kind you'll repeat. That's the whole secret. Punishing sessions feel productive for about a week, and then they backfire. So we flip it: instead of forcing the hardest workout, we start by adding movement that genuinely feels good. I'm talking about walks, swimming, cycling, dancing (personally I'm a huge supporter of the dancing 😊) and let the harder pushes show up as an added boost.

Walks count. Dancing in the kitchen counts. Playing with your kids counts. This is the gentlest, most sustainable approach there is: move in ways you enjoy, notice how you feel, repeat. No all-or-nothing, no "starting over Monday." Just movement that quietly changes everything.

SOME ACTIVITIES:

- 01 RUNNING A 5K WITH FRIENDS

- 02 JOINING AN INTERMURAL LEAGUE

- 03 DANCE CLASSES

- 04 PICKELBALL

CHAPTER FIVE

CARDIO & MOVEMENT
YOU'LL ACTUALLY DOREAD · **REFLECT** · PLAN · JOURNAL

BESTIE TIP

If a plan only works when you're perfect, it isn't a plan, it's a setup. We're building movement that survives real, messy weeks. The walk you actually take beats the workout you keep skipping.

ii REFLECT

No wrong answers here. Just be honest with yourself.

A "rule" about exercise I've been carrying that I'm ready to put down is...

One kind of joyful movement I could add more of is...

CHAPTER FIVE

CARDIO & MOVEMENT
YOU'LL ACTUALLY DOREAD · REFLECT · **PLAN** · JOURNAL*iii* PLAN*Choose one joyful movement to add this week, not a punishment to endure. Keep it generous and kind.*

WHAT I'LL ADD

WHEN IT FITS NATURALLY

HOW MY ENERGY & MOOD RESPONDED

CARDIO & MOVEMENT YOU'LL ACTUALLY DO

READ · REFLECT · PLAN · JOURNAL

iv JOURNAL

What kind of movement makes you forget you're "exercising"? When did you last let yourself do it?

This guide is here to support a stronger, kinder relationship with your body, not to diagnose, treat, or prescribe. Move at your own pace, and if anything causes pain or you have a health condition, please check in with a doctor or qualified professional first, because you deserve real support.

CHAPTER SIX

MOBILITY,
RECOVERY & REST

READ · REFLECT · PLAN · JOURNAL

/ READ

This is where results actually lock in. Recovery, sleep, and rest days aren't time off from training, they actually play a key role in results. Your body doesn't get stronger during the workout; it gets stronger afterward, while it repairs and adapts. Skip the recovery and you skip the results.

Mobility keeps you moving freely so movement stays comfortable for years. Sleep is when most of the rebuilding happens. And rest days, taken on purpose and without guilt, are what let you come back steadier instead of burnt out. Let me be very clear: rest isn't laziness. It's strategy.

CHAPTER SIX

MOBILITY,
RECOVERY & REST

READ · REFLECT · PLAN · JOURNAL

/ READ- THE QUIET WORK THAT MAKES IT STICK

MOBILITY

A few minutes of gentle stretching or joint work keeps you moving freely and makes every other session feel better. It's maintenance for the body you want to use your whole life.

SLEEP

This is the most underrated training tool there is. It's when your muscles repair, your energy refills, and your mood resets. Protecting your sleep does more than any single workout. For reference [Harvard Health](#), states women need 7-9 hours of sleep for optimal performance.

REST DAYS

Planned, not earned, and never something to feel guilty about. A true rest day lets your body adapt, so you come back stronger instead of running yourself into the ground.

CHAPTER SIX

MOBILITY,
RECOVERY & RESTREAD · **REFLECT** · PLAN · JOURNAL

BESTIE TIP

You would never tell a friend she has to earn the right to rest. So don't tell yourself that either. A rest day taken on purpose is one of the most disciplined things you can do.

ii REFLECT

Take a moment to notice what rest actually feels like for you, not what you've been told to feel.

The part of recovery I tend to skip (sleep, stretching, rest days) is...

One way I could be gentler with myself on rest days is...

CHAPTER SIX

MOBILITY,
RECOVERY & RESTREAD · REFLECT · **PLAN** · JOURNAL*iii* PLAN*Choose one recovery habit to add this week. Keep it small enough that it feels almost too easy.*

This week I progressed by...

A NOTE OF CARE

A care note: This program is general guidance, not medical advice. Move in a way that respects your body, not one that punishes it. Stop if you feel sharp pain or dizziness, and check with a doctor or physical therapist before starting if you're pregnant, postpartum, injured, or managing a health condition. If movement ever starts to feel like a source of compulsion or anxiety rather than care, please reach out to a qualified professional, because you deserve support.

CHAPTER SEVEN

YOUR WORKOUT ROUTINES

READ · REFLECT · PLAN · JOURNAL

i READ

This is your starter collection. A full-body strength session, an at-home circuit, and a blank template that's yours to fill. They're written as templates, not commandments: swap the moves, change the reps, use what fits your body and your space.

On the next pages you'll find a couple of filled-in examples to show the rhythm, then a blank card that's yours to build. A workout you'll do twice a week beats a "perfect" one you'll never touch. These are yours to scribble on.

CHAPTER SEVEN

YOUR WORKOUT ROUTINES

READ · REFLECT · **PLAN** · JOURNAL

iii PLAN

ROUTINE ONE

LOWER BODY

(about 25 minutes)

GLUTES · HINGE · SIDE-GLUTE

**GLUTE BRIDGE***Lie back, drive hips up, squeeze hard at the top.***3 SETS**
12-15 REPS**ELEVATED HIP THRUST***Shoulders on a couch or bed, thrust hips skyward.***3 SETS**
12-15 REPS**CURTSY LUNGE***Step back and across; targets the side glutes.***3 SETS**
8-12 / SIDE**DONKEY KICK***On all fours, press one heel toward the ceiling.***3 SETS**
12-15 / SIDE**BANDED CLAMSHELL***On your side, open the top knee against the band.***3 SETS**
15 / SIDE**CALF RAISE***Rise onto your toes, pause, lower with control***3 SETS**
15/20

WARM UP FIRST | 5 MIN

March in place, hip circles, 10 air squats, and a few leg swings to wake everything up.

CHAPTER SEVEN

YOUR WORKOUT ROUTINES

READ · REFLECT · **PLAN** · JOURNAL

iii PLAN

ROUTINE TWO

LOWER BODY

(about 25 minutes)

SQUAT · SINGLE-LEG · CORE

**TEMPO SQUAT***Three counts down, drive up. Chest tall throughout.***3 SETS**
12-15 REPS**STEP UP***Step onto a sturdy chair or stair, drive through the heel.***3 SETS**
10-12/ SIDE**REVERSE LUNGE***Step back, drop the back knee, rise through the front heel.***3 SETS**
10-12 / SIDE**FIRE HYDRANT***On all fours, lift one knee out to the side.***3 SETS**
10-12 / SIDE**SINGLE LEG BRIDGE***One foot down, one leg long, bridge through the heel.***3 SETS**
10-12 / SIDE**PLANK HOLD***Hold a straight line; brace through the middle.***3 SETS**
20-40 SEC

BESTIE TIP

Single-leg work feels humbling at first, but that's your balance and stabilizers getting stronger. Hold a wall if you need to.

CHAPTER SEVEN

YOUR WORKOUT ROUTINES

READ · REFLECT · PLAN · JOURNAL

i READ

ROUTINE THREE

LOWER BODY

(about 25 minutes)

BALANCE · POSTURE · RECOVER

**BODYWEIGHT SQUAT***Your foundation. Sit back and down, drive up tall.***3 SETS**
15 REPS**OVERHEAD REACH***Reach tall to wake up shoulders and posture.***2 SETS**
12 REPS**FLOOR SUPERMAN PULL***Lie face down, pull elbows back, lift the chest.***3 SETS**
10-12 REPS**CURTSY LUNGE***Cross-step lunge for the outer hips and thighs.***3 SETS**
12-15 / SIDE**GLUTE BRIDGE MARCH***Hold a bridge, march knees one at a time.***3 SETS**
10-15 / SIDE**STRETCH & BREATHE***Lengthen hips, hamstrings, and back. Breathe.***3 MIN**

BESTIE TIP

If workouts feel too light add a heavier weight, or bring the weight down slower and increase reps.

CHAPTER SEVEN

YOUR WORKOUT ROUTINES

What's one way you made a workout fit your real life this week, instead of the other way around?

This guide is here to support a stronger, kinder relationship with your body, not to diagnose, treat, or prescribe. Move at your own pace, and if anything causes pain or you have a health condition, please check in with a doctor or qualified professional first, you deserve real support.

CHAPTER EIGHT

RESOURCES & YOUR
MOVEMENT TOOLKIT

READ · REFLECT · PLAN · JOURNAL

i READ

CONGRATULATIONS! You've done the inner work and built the habits, this last chapter is the practical shelf you reach for when you want to go a little deeper. None of it is required. This is simply an honest list of tools that make movement easier, never the things you have to buy before you're allowed to begin.

Take what serves you, leave the rest.

The only tool you truly needed, you already had: a body worth respecting and the willingness to show up for it.

CHAPTER EIGHT

RESOURCES & YOUR
MOVEMENT TOOLKIT

READ · REFLECT · PLAN · JOURNAL

i READ

Free, credible places to keep learning. No paywalls, no fear-mongering, no “transformation” culture.

MOVEMENT YOU CAN FOLLOW ALONG TO

Free full-length workouts on YouTube from creators who teach form and meet you where you are. Look for channels that cue technique and offer modifications, specifically targeting strength, mobility, low-impact, and beginner series. Not ones selling a “shred.”

WALKING & EVERYDAY MOVEMENT

Free walking apps and step trackers already on most phones. A simple daily walk, counted however you like, is some of the most sustainable movement there is.

FORM & TECHNIQUE

If a move ever feels off, a one-time session with a certified personal trainer or physical therapist, even virtual can be worth more than months of guessing. Ask about a single “form check” session; many offer them.

CHAPTER EIGHT
